Industry: Industrial Manufacturing,
Metal Fabrication

Country: USA

"The built-in features in VISUAL are self-evident cost savers and represent an overwhelming improvement in running the business."

—Mike Hansen, CEO,
J&E Manufacturing Co.

About the company.

J&E Manufacturing Company is a contract manufacturer of precision metal components. The company has five locations throughout the Minneapolis/St. Paul metro area and western Wisconsin, with a combined area of more than 150,000 square feet. J&E's extensive range of in-house capabilities includes sheet metal fabrication, stamping, welding, CNC turning, CNC milling, powder coating, screen printing, and assembly. The company also maintains an engineering staff and a tool & die department. To learn more, visit <http://www.jecompanies.com>.

Challenges.

- Reduce workload and errors inherent in a custom manufacturing environment where lead times are short, the quantity and variety of different parts to be processed are many, and new orders are constantly being added with little notice.
- Improve visibility of workload and due dates.
- Gain the ability to better manage inventory.

Benefits.

- Reduced missed ship dates due to overlooked or late work orders thanks to the automatic creation of work orders and materials requirements in Infor's VISUAL scheduling solution.
- Required fewer people to schedule production and order materials.
- Improved on-time delivery and productivity.
- Decreased the amount of on-hand inventory required due to the system's ability to calculate material requirements and specify when they are needed.

"Infor VISUAL is a highly efficient software system for manufacturers willing to use its capabilities to the fullest extent."

—Mike Hansen, CEO,
J&E Manufacturing Co.
