Don't Let Unplanned Downtime be a Thorn in Your Side

Unplanned downtime is a MAJOR problem...

that's too expensive to keep brushing off as the status quo.

Yet many are still hesitant to invest in a purposebuilt MRO solution.

As a result, critical materials are often unidentifiable and lacking the visibility to locate the right part at the right time comes at a high cost when unplanned downtime occurs. Are you allowing unnecessary risk to threaten your operations?

Did you know?

The Global Fortune 500 loses a cumulative **3.3 million hours** a year in unplanned downtime.

For Manufacturers...

not only is asset downtime a major pain point, it's often their worst nightmare, yet 82%of companies have experienced at least one unplanned downtime outage over the past three years.

Not only are unexpected outages frequent, they are incredibly costly due to missed SLAs that result in companies losing \$10,000s per hour.

Average cost per hour by industry:

Industrial Manufacturing:

\$187.5K

CPG

But these numbers don't tell the whole story...

When it comes to production outages, additional costs are lurking beneath the surface.

When it comes to MRO, you have to consider:

Amount of time spend looking for a part

Ability to locate part at sister plant \$\$\$ of rushed part orders

Asset recovery time

While hidden, these costs have a direct impact on your bottom line. But manufacturers don't have to let these worries keep them up at night.

Verusen's MRO Intelligence platform allows you to quickly locate the parts you need from anywhere in your supply network to drastically minimize asset downtime.

Visual Knowledge

We provide solution to your information needs

We help companies to focus on core, revenue-generating activities, delivering value to customers. By using HxGN's software and our services to automate operations, streamline processes and access real-time business information anytime, anywhere, growing businesses realize breakthrough performance improvements.

Our goal is to deliver lasting return on investment, long-term sustainability, and the flexibility to adapt and grow. We understand that one size fits all software doesn't meet your business requirements. That's why we focus on provide software for key verticals that have specialized needs.
